

It's about transforming lives

Green Longwing Butterfly *Philaethria dido*

The **Green Longwing Butterfly** is found in tropical rain forests from northern Mexico to Brazil. The upper side of both wings is black with large patches of translucent green. The adults are very agile and fly above the forest canopy.

Green Longwing Butterfly Society: a group of individuals, companies, service clubs and foundations who give a \$10,000 donation to advance the work of The Canadian Hearing Society in serving those who are deaf, deafened and hard of hearing.

Most butterflies are deaf.
