

# It's about transforming lives

## **Red Admiral Butterfly** *Vanessa atalanta*

**The Red Admiral Butterfly** is found in almost any habitat from the tundra in Canada to subtropic countries near the equator. They cannot survive extremely cold winters which means that most of North America must be recolonized each spring by Red Admirals migrating north.

**Red Admiral Butterfly Society:** a group of individuals, companies, service clubs and foundations who give a \$5,000 donation to advance the work of The Canadian Hearing Society in serving those who are deaf, deafened and hard of hearing.

**Most butterflies are deaf.**
